

CETO™

Smart Energy Saver

Universal Motion Remote

CETO™ SMART Features

CETO™ UMR-902 is a **Universal Motion Remote** with a motion sensor, programmable for unparalleled energy savings up to 60% in the operation of any air-conditioning system that incorporates a built-in remote control receiver. It is capable of operating over 6,000 different brands and models of air-conditioners.

CETO can detect human motion within 25-foot radius and control the operation of an air-conditioner according to the presence of human motion and can be programmed to turn the air-conditioner off completely or have the setting temperature increased to a desired setting for incredible energy savings.

CETO's default mode would be **ECO mode**, which adjusts room temperature based on occupancy and temperature / time settings.

CETO besides being a **Universal Motion Remote**, can also be used as a night lamp where the LCD screen will light up upon detecting motion in the given room. After a period of time, the LCD screen will turn back off automatically.

CETO can function as a thermometer, hygrometer and also as a time clock with a timer on / off function.

CETO can be used as a wall thermostat fixed on a wall or, with its adjustable bracket, can be set on a table or desk for outstanding convenience.

CETO can be set up and installed in under 5 minutes with no power or control wiring required.

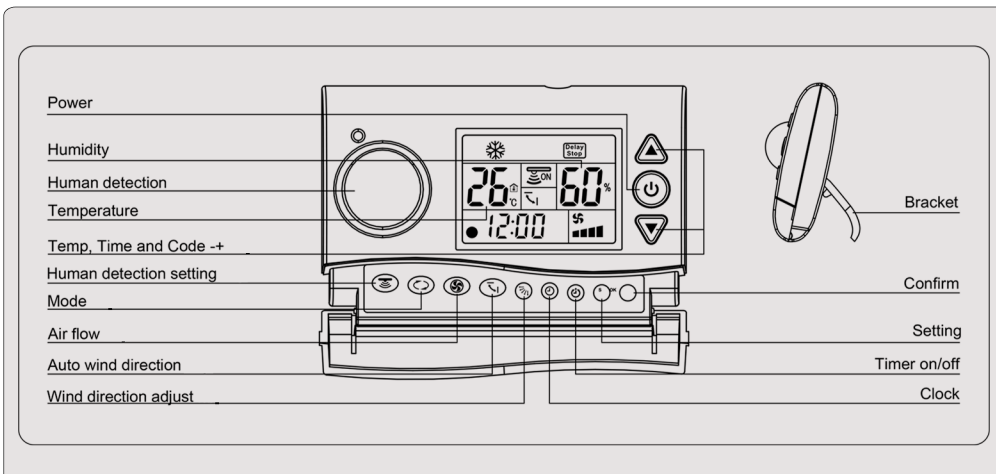

Universal Motion Remote

CETO Settings Available:

- ✓ A/C Brand Code
- ✓ DELAYED Stop
- ✓ FAN SPEED
- ✓ CLOCK
- ✓ ON/OFF
- ✓ ECO Motion
- ✓ TEMPERATURE
- ✓ LOUVER
- ✓ TIMER
- ✓ NIGHT LAMP

CETO Technical Parameters:

Distance to A/C Unit: 25 ft (7.5 m)
 Power: DC 4.5V (3 AAA Batteries)
 Battery Life: Apx. 6 Months
 Dimensions W x H x D in (mm):
 4 3/8 x 1 3/4 x 7/8 (112 x 44 x 22)
 Weight: 3 oz (80 g)
